		Do not disassemble or modify the product. Product may breakdown and not work properly. Any modification to the product will be out of warranty.

Regular Care

Maintenance

Clean and wipe around the bottom rail. Wipe away the sand, dust, debris and etc. This will protect the rail from the plastic wear, crack, etc and maintain the smooth movement. We ask you to clean every once in a while.

●NOTICE
Do not use lubrication spray.
Dust and debris may adhere and stick.

How to clean

Use a water damped cloth to wipe and clean the product. Read " **Wash and Clean**" in case the stain does not come off with damped cloth.

●NOTICE
Do not use detergent for cleaning the product.
Color may change and damage the product. Do not use thinner and benzene.

Do not use wire brush or any steel bristle to rub and clean the product.
It may result in product damage. Use soft cloth to wipe out the dust and debris.

Remove the unit

You can remove the unit when out of season or wish to clean. Hold the stile post with both hands and pull towards the stop post. Unit will detach from the anchor plate. Slide slightly above from the ground and twist the unit on either side while pulling for removable. After the unit is detached from the anchor plate, tilt it until the very top comes out of Top Rail.

Wash and Clean

1. Open the unit and lean it against the wall.
2. Clean and wipe the place where you are pouring the water on. Wipe it gently with a very soft brush.
3. After finish cleaning the unit, let it all dry before attaching the unit back.

Attach the Screen Unit

- How to place back the screen unit after maintenance.
1. Tilt in the head of the screen inside the Side Cap and place the unit on Bottom Rail.
 2. Make sure the unit is on the Bottom Rail and push it in the unit on the Anchor Plate until you hear the click.
- Proceed the same on the other side in case of Double Door.

●NOTICE
Open and close the unit after installation and make sure it does not come off.

	Caution	Do not operate the product when the product is broken or not properly installed. Product may come off and may result in a fall accident.
--	----------------	--

Attention

Caterpillars are sagging from the top.

When this product is used under windy and gusty conditions, the caterpillars may sag down.
Place back the caterpillars to its original position while holding the sliding bar.
Sliding bar may come off if you operate before placing the caterpillars back to its original position.
If you find the sliding bar coming down, remove the unit from the wall before placing the caterpillars back.

Caution **Retract the insect screen, close the door and window when the wind is strong.**
Product may come off and break resulting in injury.

How to reconnect the caterpillars

Push in the caterpillars as shown in the figure.
You can easily reconnect by spreading the sides outwards.
Take close attention to the direction of caterpillars.
Align the pin direction.

Opening and closing the screen door

Slightly lift the Hold Hook when operating the screen. Close from the screen unit attached to the side wall and make sure to hold the Sliding Bar of the opening unit. After first screen unit is closed, continue with the next one.

Release the claw from the stile post.

Push the Sliding Bar when opening the screen and hook the Hold Hook on Stile Post. Always operate by holding the center of the Sliding bar.

Caution

Do not operate while hands are on the bottom rail or any place other than sliding bar.
Your hands or fingers may get caught during operation and result in injury.

Do not operate with strong force.
Product may be derailed and come off if operated with strong force and result in injury.

Q and A

Q The open-close movement is stiff and heavy.

A Read "**Maintenance**" and clean the bottom rail and sliding bar. Dust and debris may affect the movement of the product.
If you do not find any difference after cleaning, contact the local store you purchased the product.

Q We find out that opening size of installation site is not same with product size. Is this product adjustable?

A This product has height adjustment range of -10mm and +10mm only. Adjustment can be done within this range.
By cutting the top and bottom rail, you can install it in a narrow location.
You can cut either side of rails. Make sure not to deform the rails when cutting it short.

Q A hole on pleated net is made inadvertently and wires are cut. What should I do?

A Pleated net on Zipooh is exchangeable.
Contact the local store you purchased and order a new net ass'y.
Read "**Replacing pleat net ass'y**" before placing your order.

Q I damage my screen door and it does not open. Can I place a hook or lock on the product?

A Contact the local store you purchased for the damage. The dent may affect and interfere the movement of caterpillars.
Do not modify the product. Do not place a hook or lock.
This may also affect the movement of product and cause malfunction.

Caution

Do not disassemble or modify the product.

Product may breakdown and not work properly. Any modification to the product will be out of warranty.
